

It sickens me to think that NAB is trying to stop satellite radio from broadcasting local traffic and weather. The only reason that they want petition 04-160 is so that they can get more advertising money by making listeners weed through the endless commercials just to hear the 2-minute traffic and weather reports. It's bad enough that we have to put up with it on cable television (which in it's original inception was suppose to be commercial free as well.) One of the main reasons that I purchase satellite radio is to get instant commercial free access to traffic and weather not to mention uncensored programming of all types of formats. I don't want anyone telling me what I can and cannot listen to, especially when I'm paying for it. This is wrong and is an infringement on my first amendment rights as a citizen of our great country.
